## New England Biolabs Certificate of Analysis

Product Name:	Amylose Resin
Catalog Number:	E8021L
Packaging Lot Number:	10238367
Expiration Date:	03/2027
Storage Temperature:	4°C
Specification Version:	PS-E8021S/L v2.0

Amylose Resin Component List			
NEB Part Number	Component Description	Lot Number	Individual QC Result
E8021LVIAL	Amylose Resin	10229424	Pass

Assay Name/Specification	Lot # 10238367
Functional Binding Assay (Resin Binding Capacity) Amylose Resin (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosin∆Sal fusion protein (8 ml) was then passed through the column at 25°C, then washed with column buffer and the target protein eluted with ≥4 ml of column buffer containing 10 mM maltose. Binding capacity was determined to be >4 mg MBP5*-paramyosin∆Sal /ml of resin based on A280 of the eluate.	Pass
Functional Binding Assay (Resin Binding Specificity) Amylose Resin (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosin∆Sal fusion protein (8 ml) was then passed through the column at 25°C, and then washed with column buffer. The target protein was eluted with ≥4 ml of column buffer containing 10 mM maltose. SDS-PAGE of the eluate on a 10-20% Tris-Glycine gel confirms low non-specific binding of extract proteins and high isolation of target.	Pass

This product has been tested and shown to be in compliance with all specifications.
